

C. U. SHAH (GOVT) POLYTECHNIC SURENDRANAGAR COMPUTER ENGINEERING DEPARTMENT

Topic : DCE Book Store

➤ Project Introduction.

Welcome to the DCE Book Store project, an innovative solution designed to enhance the online purchasing book. Developed using PHP, this platform offers a robust set of features that cater to both educators and learners. With functionalities for user management, course enrollment, secure payment processing, and feedback collection, this platform is engineered to support a wide range of educational needs. Its intuitive interface and efficient back-end processes ensure a seamless user experience, making it an ideal tool for managing online education.

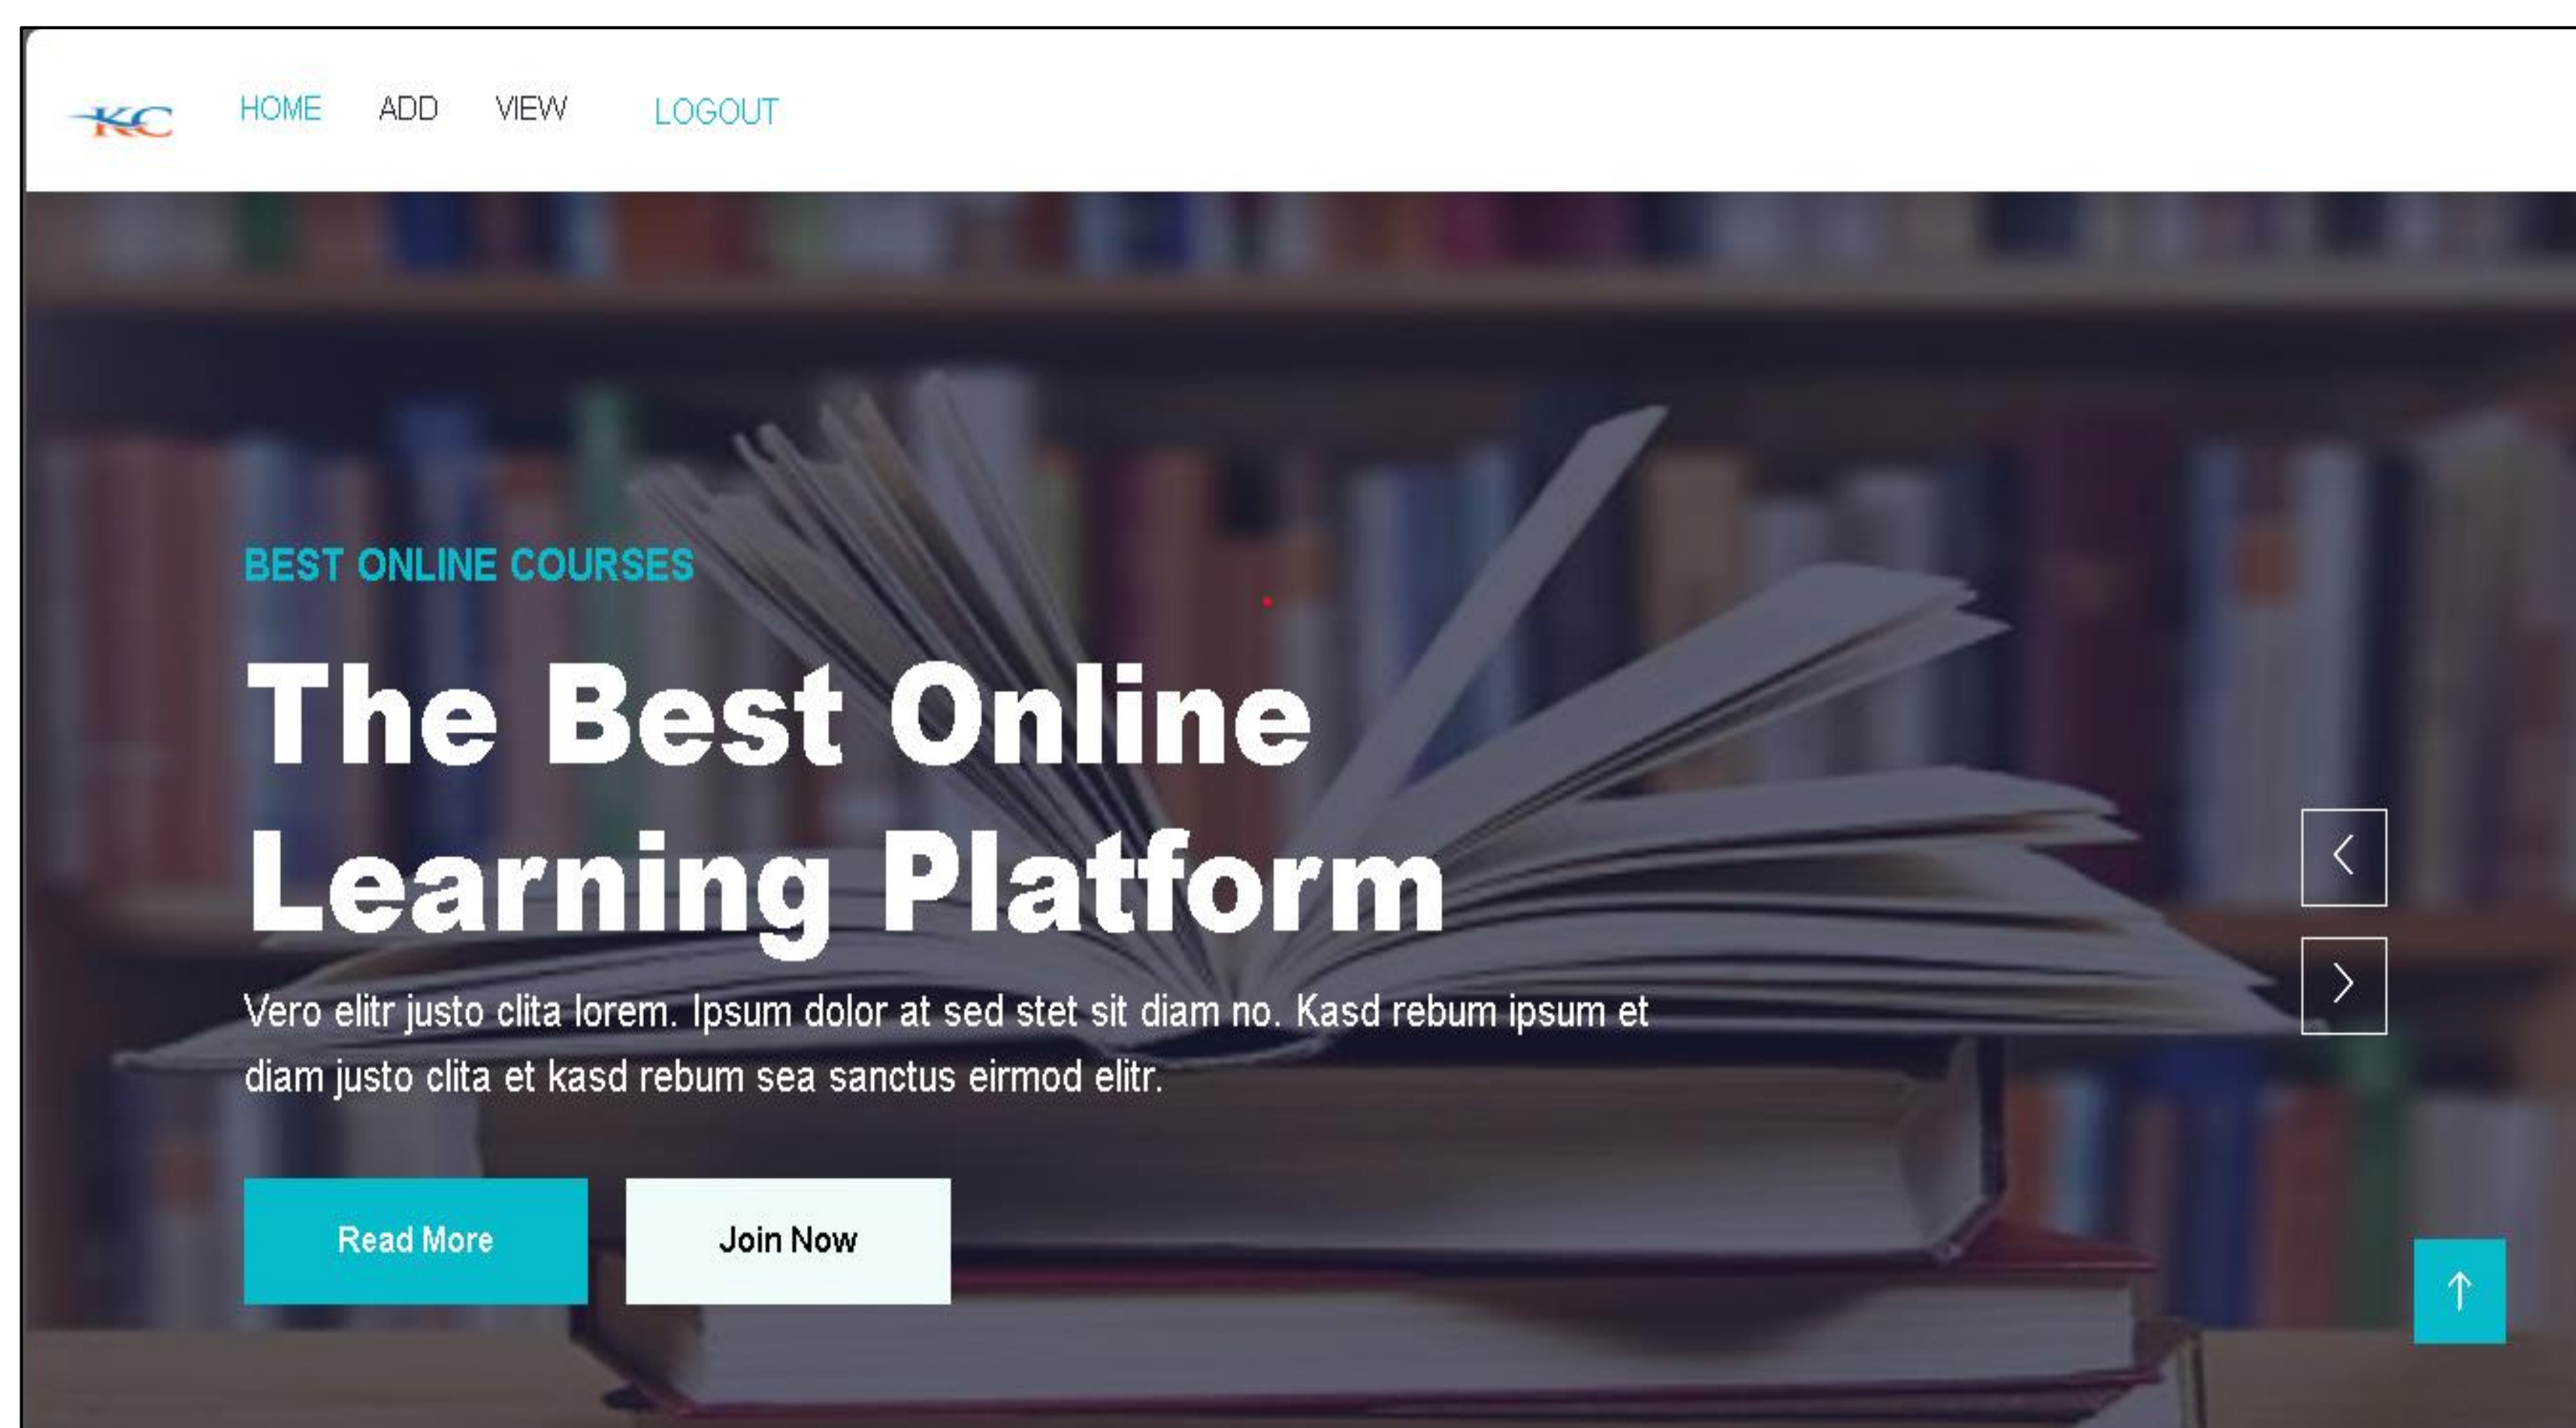

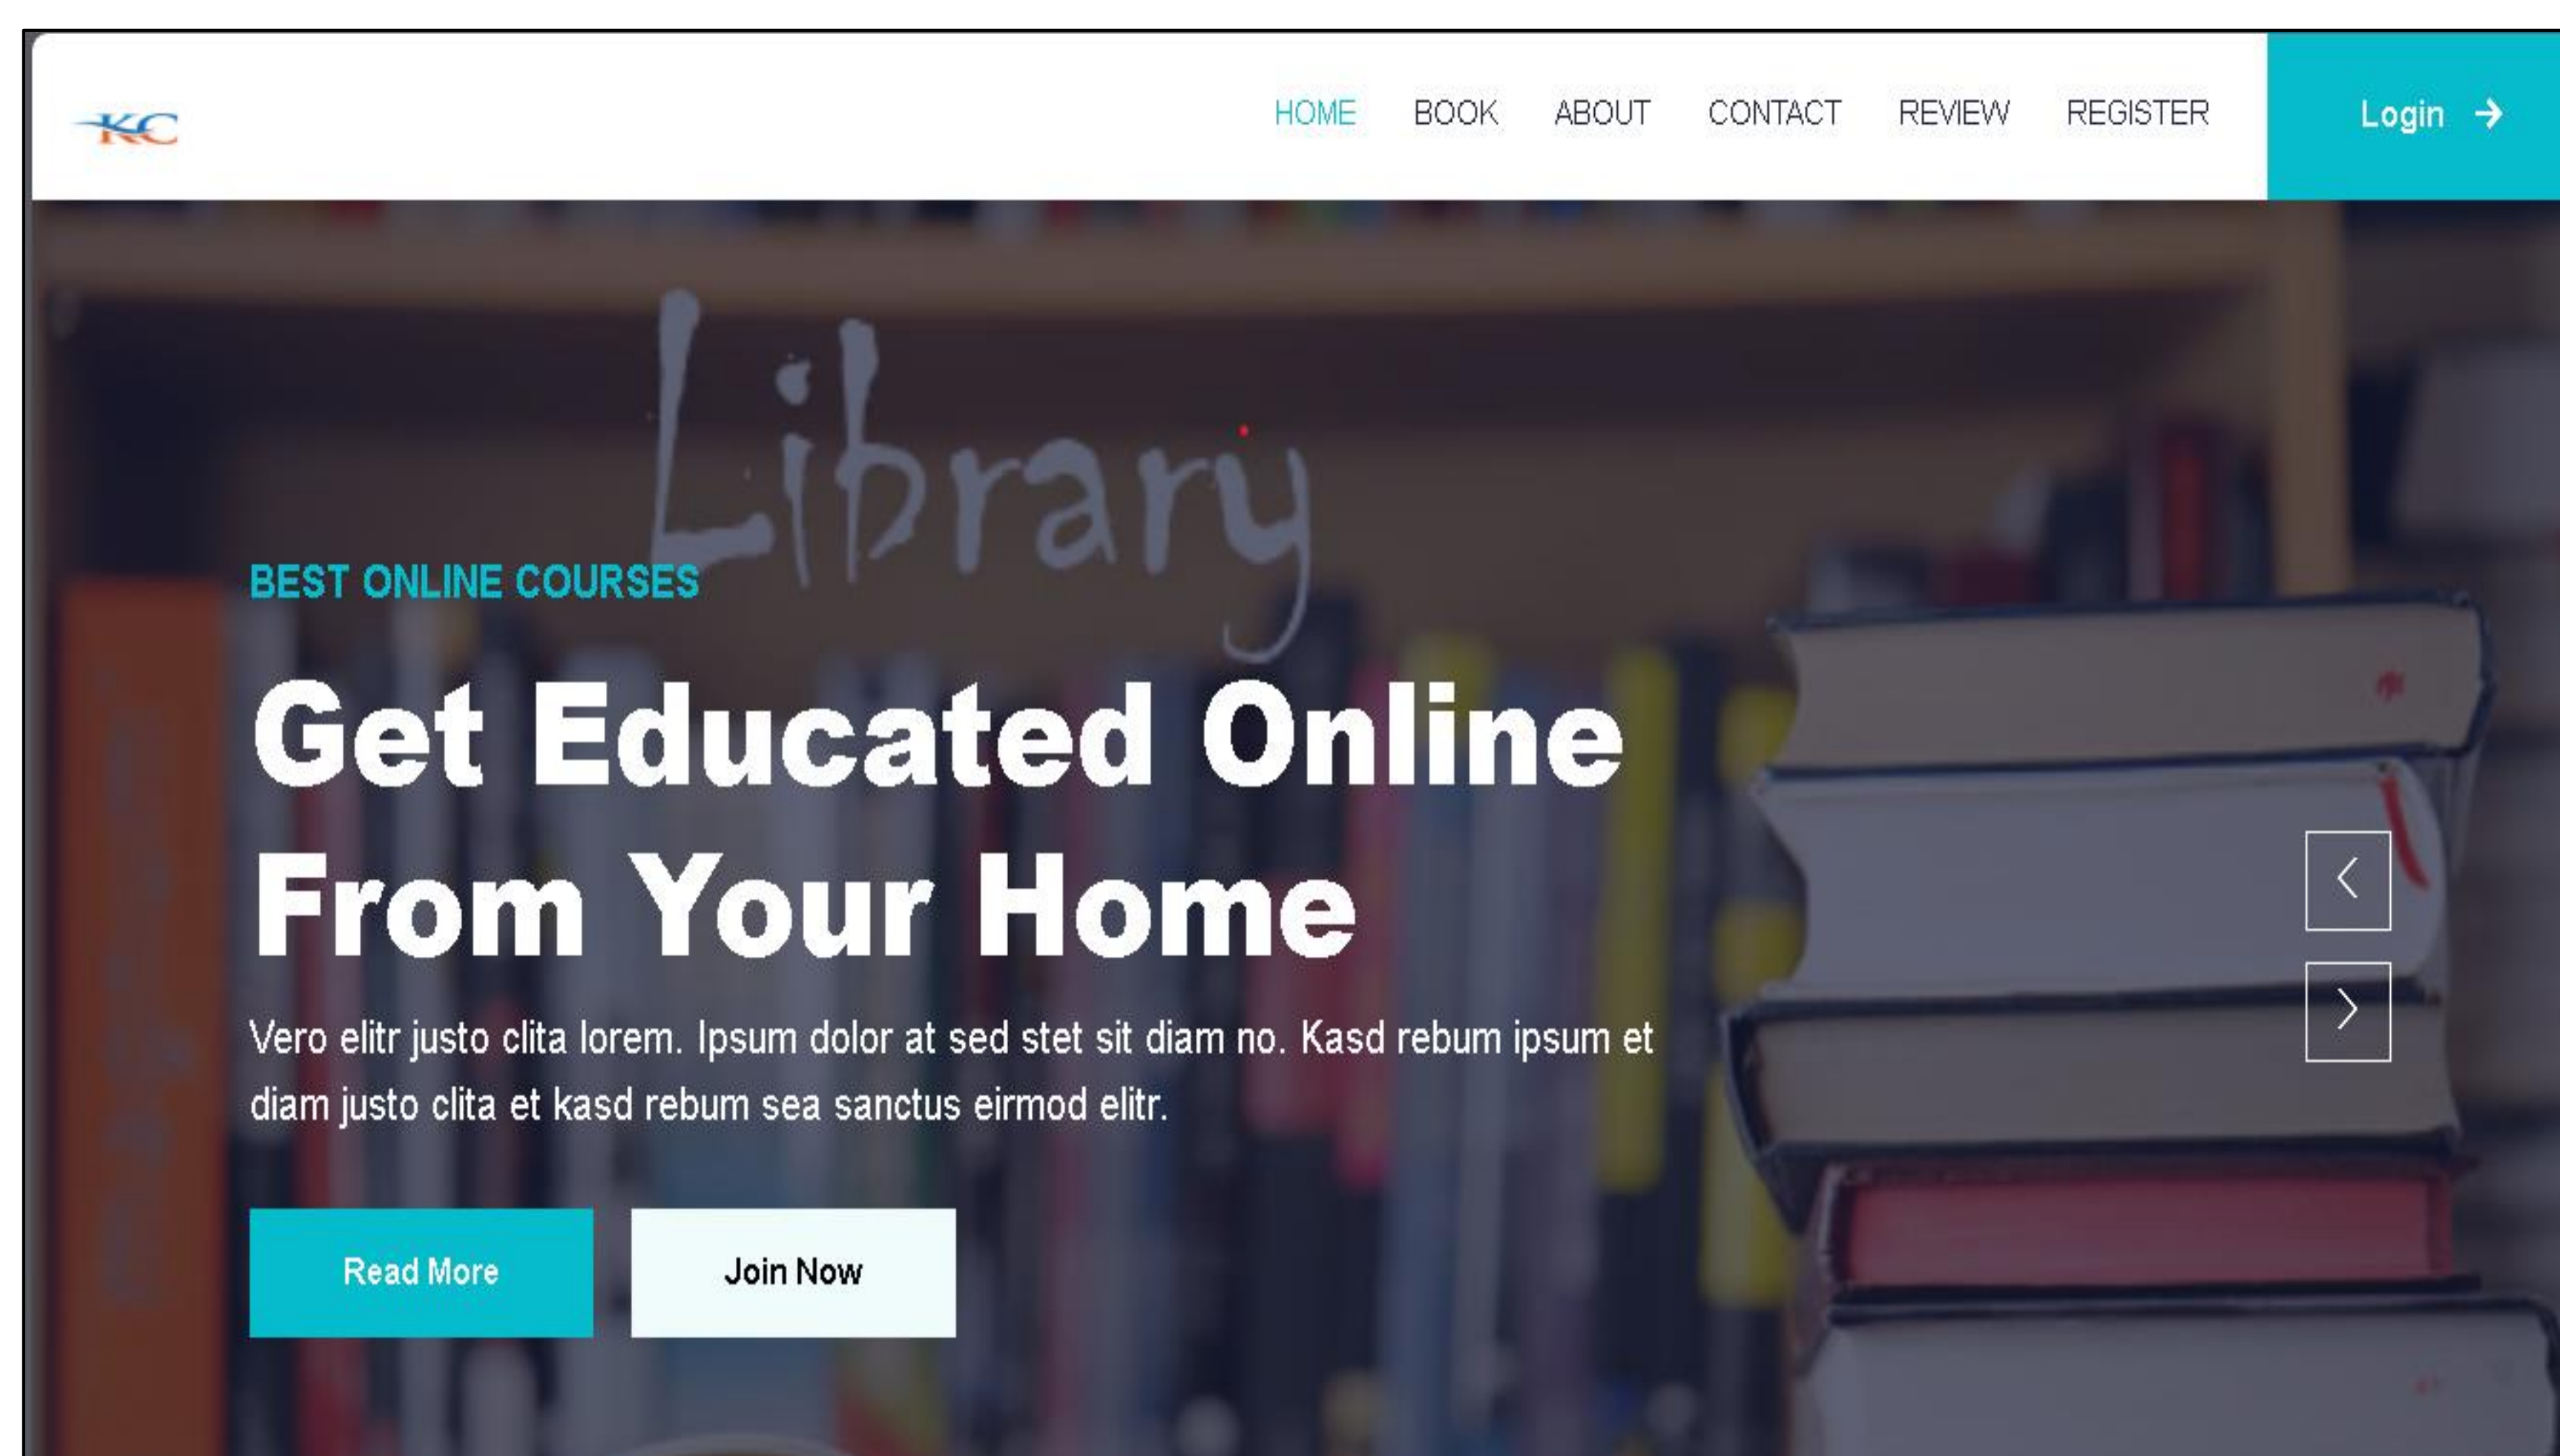

➤ Language/Database:-PHP/ MYSQL.

➤ Key Features.

- 1.User Management
- 2.Order and Payment Handling
- 3.Feedback and Review System

➤ Future Work.

1. UPI Payment.
2. Improvement In Profile.
3. Providing Best Security.

➤ Project Advantages.

- 1.Comprehensive User Management.
- 2.Order and Payment Processing.
- 3.Review and Feedback System.

➤ Project Disadvantages.

- 1.Scalability Concerns.
- 2.Potential Security Vulnerabilities.
- 3.Lack of Advanced Features.

➤ Frontend pages: home, index, product, categories, cart, checkout, login, register, About.

➤ Admin pages: admin, add_category., addproduct, editproduct, inventory, admincartview.
